The cheques of unsuccessful tenderers will be returned to them when the contract has been awarded.

Tenders must be made out on the forms supplied and enclosed in the envelopes furnished.

Tenderers must submit with their tenders a list stating the type, capacity, and present location (so that inspection can be made if necessary) of the equipment in their possession or at their disposal that is immediately available for the carrying-out of the work within the time-limit specified without

in any way curtailing or delaying any Departmental project that may be under contract at this date. No tender will be considered that does not contain this information. For accounting reasons, only, the portions of the Trans-Canada Highway have been placed in separate contracts; therefore, tenderers who bid Section 2 must also bid Section 2A at the same unit prices; likewise Section 5 and Section 5A. No tender will be accepted for these sections that does not fulfil these conditions.

No tender will be accepted or considered that contains an escalator clause or any other qualifying conditions.

The lowest or any tender will not necessarily be accepted.

Only contractors or contracting firms that have been incorporated and carrying on business in Canada for a period of at least one year prior to the date of tenders are eligible for work on the Trans-Canada Highway.

"ELECTRICAL ENERGY INSPECTION ACT"

REGULATIONS

NOTICE is hereby given that, by Order in Council No. 653, approved March 21st, 1953, the following regulations have been made:—

REGULATIONS GOVERNING ELECTRICAL PERMITS AND INSPECTION FEES

1. PERMITS

(a) On and after such date as may be notified by publication of a notice in the Gazette, it shall be unlawful, excepting as hereinafter provided, for any person to construct, install, or alter any electrical work in or upon any premises until he shall have made application in writing and obtained a written permit therefor from the Inspector, and any person who does any such work without being the holder of a written permit therefor from the Inspector shall be guilty of an offence against these regulations punishable on summary conviction by a fine not exceeding fifty dollars (\$50).

(b) Such application shall clearly set forth the proper address of the premises concerned, with full details of the ownership, occupation, and purpose for which said premises are to be used, and shall list in detail the particulars of size and voltage of service, number of outlets, number and sizes of switches, panels, motors, and such other details as may be required on the application form supplied by the Inspector of Electrical Energy.

(c) Application for a permit for electrical work shall be submitted by the person carrying out the work, and shall be signed by him. It shall be accompanied by payment of inspection fees as set forth hereinafter, and no permit shall be issued until such payment has been made. The cost of the permit is to be included in the inspection fees.

(d) Issuance of a permit shall not entitle the holder thereof to install any electrical work which is not in accordance with the regulations, and notwithstanding anything which may be written in the permit, the Inspector may order such changes or additions as may be required to bring the work into conformity with such regulations as may be in force.

(e) The Inspector shall have the right to collect further inspection fees or to make such adjustments as may be necessary to correct any error in the calculation of fees made at the time of issuance of the permit.

(f) Every electrical installation shall be commenced within ninety (90) days after the date of issuance of the permit therefor; otherwise said permit shall be deemed to be void unless the holder shall have obtained an extension in writing from the Inspector.

(g) No permit for electrical work shall be issued to any person who is not the holder of a certificate of competency or annual permit in good standing from the Government of the Province of British Columbia entitling him to carry out such work within the Province; provided that nothing in these regulations shall prohibit any person from obtaining a permit to carry out personally any electrical work on or within his own premises. No permit may be transferred from said holder to any other person, unless written authority for the transfer shall have first been obtained from the Inspector.

(h) Upon completion of the electrical work as covered by the permit, the holder thereof shall notify the Inspector in writing on the prescribed forms that the said work is ready to be inspected. As soon as practicable after receipt of such notification, the Inspector shall carry out an inspection of said work, and shall issue a certificate of approval, or shall order such changes as may be necessary to bring the work into conformity with the regulations. Excepting as hereinafter provided, no electrical work shall be connected to any source of electrical energy until final certificate of approval has been issued therefor.

(i) Payment of the inspection fee shall entitle the permit-holder to one inspection and one re-inspection. Should any further inspections be necessary each subsequent inspection shall be charged for at the rates set forth under "Miscellaneous Inspections" (see Schedule V).

(j) No person shall render any electrical work or portion thereof inaccessible by lathing, boarding, or any other building construction until said work has been inspected and approved by the Inspector. The Inspector may order the immediate suspension of any or all electrical work by posting a notice on the premises or by issuing written instructions to the permit-holder, and it shall thereafter be unlawful for any person to proceed with such work until permission therefor has been given by the Inspector.

(k) The Inspector may, at his discretion, refuse to issue a permit for electrical work in or upon any premises where the existing electrical work is not in accordance with the regulations.

2. ANNUAL PERMITS

(a) Annual permits may be issued by and at the discretion of the Inspector to the operator of any industrial, commercial, or other establishment in which said operator employs his own full-time electrician or electricians, and in which the nature of his business necessitates alterations, repairs, or additions to the plant at short notice. Such alterations, repairs, or additions may be carried out by said operator's own electrician or electricians, without the formality of taking out a permit for each such alteration, repair, or addition, provided that the said operator is the holder of an annual permit for the current calendar year. Such annual permit shall not, however, entitle the holder to proceed with any major addition to or expansion of the plant.

(b) Before beginning any major alteration to or expansion of the plant, the operator thereof shall obtain a permit as required by section 1 of these regulations, and shall pay all fees as required by section 6 herein. He shall submit for examination such plans and specifications as may be required under section 4 and shall pay such fees as are prescribed therein.

(c) For the purposes of this regulation, a major alteration or addition shall be deemed to be one which involves the alteration or addition of electrical equipment of which the combined horsepower exceeds the amount specified in the annual permit for the said establishment.

(d) Each establishment for which the operator holds an annual permit shall be inspected every six months, or as soon thereafter as practicable. The operator shall maintain in his establishment at all times an accurate record of all alterations and additions which have been carried out in the said establishment since the last previous visit of the Inspector. Such record shall be made available to the Inspector upon request.

(e) The fee for an annual permit for any one plant or establishment shall be as listed hereunder. Where one person, firm, or corporation has more than one business establishment, a separate annual permit shall be required for each such establishment.

Such permits shall be valid for a period not exceeding ninety (90) days, but may be renewed for further periods at the discretion of the Inspector. In the event of non-renewal of the permit, supply of current shall be immediately discontinued.

(b) Issuance of a temporary current permit shall not obligate the Inspector to authorize the supply authority to connect up to their lines, if in the opinion of the Inspector the supplying of current would create a hazard to life or property.

For lighting only	\$2.50
For power only	2.50

Such electrical plans and specifications shall be submitted to the Inspector by the owner or by the duly accredited agent of the owner of the said premises, and acceptance thereof obtained before a permit is issued.

(b) Fees for examination of plans and specifications shall be:—

The said fee shall be based on the installed capacity of the generators which supply energy to the system. In the case of a city, municipal, or similar body which purchases electrical energy in bulk from another public utility and distributes to consumers, the fee shall be based on the maximum one-hour demand in the preceding year as measured on the metering equipment at the point of supply. Where no maximum-demand meter exists, the fee shall be based on the installed transformer capacity of the substation from which the said city, municipality, or similar body receives its supply of electrical energy.

(d) The minimum annual inspection fee shall be five dollars (\$5).

In the case of a person who generates electrical energy primarily for consumption by his own business, but who also distributes for consumption by, or sale to, his employees or to the public a portion of such energy in excess of fifteen per centum (15%) of his generating capacity, the inspection fee shall be based on the installed capacity of the transformers which supply electrical energy to such consumers. The annual fee shall be computed on the basis of one and one-half cents (1½¢) per kilovolt-ampere of generator capacity, maximum one-hour demand or transformer capacity of the substation, as the case may be. On or before the first day of April in each year, every public utility shall submit to the Inspector of Electrical Energy a true record of its installed generator capacity or substation transformer capacity as of the thirty-first day of December in the preceding year, or its maximum one-hour demand for the preceding year. The fee for each calendar year shall become due and payable on or before the fifteenth day of May of that year.
